PROFESSIONAL SUMMARY

A self-driven tech enthusiast from a humble background, passionate about building products, solving real problems, and helping teams grow. Currently leading UI development of FleetEnable - a logistics SaaS product focused on drayage and freight management. Technical Lead with 3+ years of experience mentoring 10+ developers and conducting 100+ interviews.

TECHNICAL SKILLS

React & Redux • Node.js & Python • Technical Leadership • Team Mentoring • System Architecture • Chrome Extensions • AI & RAG Pipelines • Competitive Programming • MySQL & Redis • Vite & RTK Query • Twilio & Stripe Integration • Supply Chain SaaS • Interview & Hiring

PROFESSIONAL EXPERIENCE

Technical Lead | Imaginnovate (FleetEnable Product) - <https://fleetenable.com/>

Feb 2024 - Present (1 yr 6 mos)

- Leading UI development of FleetEnable - a logistics SaaS product focused on drayage and freight management
- Technical leadership and project management using React, Redux, Vite, and RTK Query
- Collaborating with product and backend teams, defining technical strategies
- Ensuring quality feature delivery and maintaining high code standards
- Built AI-powered chatbot & RAG pipeline for complex configuration queries

SDE 3 | Imaginnovate (FleetEnable Product) - <https://fleetenable.com/>

Dec 2021 - Oct 2024 (2 yrs 11 mos)

- Developed cutting-edge technology for logistics and supply chain management
- Built daily dashboards using Python, providing actionable business insights
- Transitioned to FleetEnable product development focusing on drayage solutions
- Mentored 10+ developers in React and frontend development
- Conducted 100+ interviews for hiring senior and junior developers

Software Engineer | Coditude (previously VSH Solutions)

Jan 2021 - Dec 2021 (1 yr) - Remote from Pune, India

- Built Chrome Extensions including Mail Tracker using Redis, Python, and Chrome APIs
- Worked on LVRG (Supply Chain & Inventory Management) - <http://lvrg.ai/> with React, Redux Thunk, Node.js, and MySQL
- Integrated Twilio and Stripe in Next.js applications
- Developed full-stack solutions for supply chain optimization

Freelance Developer | Eclatecs - <https://web.archive.org/web/20190831073120/https://eclatecs.com/>

2019 (Self-learning & Freelance)

- Freelanced web development projects while building foundational skills
- Worked on various client projects to gain real-world experience
- Self-taught web technologies and modern development practices

Competitive Programmer & Student | Self-Learning & Development

2018 - 2021 (3 yrs)

- Actively participated in competitive programming competitions
- Developed strong algorithmic thinking and problem-solving skills
- Self-learned multiple programming languages and frameworks
- Built foundation for efficient problem-solving in real-world development

EDUCATION

B.Tech (CSE, Lateral Entry) | ANITS, Visakhapatnam | 2017 – 2018 | Sangivalasa, Visakhapatnam

Diploma (Mechanical) | SVGP, Tirupati | 2014 – 2017 | Tirupati, Andhra Pradesh

6th – 10th Class | Bhashyam Public School, Visakhapatnam | 2008 – 2013 | NAD Junction, Visakhapatnam

Primary (Up to 5th) | Jubilee English Medium School, Visakhapatnam | 2003 – 2008 | Visakhapatnam

PROJECTS

FleetEnable - Logistics SaaS Platform

Leading UI development of enterprise logistics platform focused on drayage and freight management. Built with modern React ecosystem for scalable supply chain solutions.

Technologies: React, Redux, Vite, RTK Query, Python, MySQL

AI-Powered Configuration Chatbot

Built AI-powered chatbot with RAG pipeline for handling complex configuration queries. Demonstrated advanced AI integration capabilities.

Technologies: AI/ML, RAG Pipeline, Python, React

Mail Tracker Chrome Extension

Developed Chrome extension for email tracking with real-time analytics and user behavior insights.

Technologies: Chrome APIs, Redis, Python, JavaScript

LVRG - Supply Chain Management

Built comprehensive supply chain and inventory management system with real-time tracking and analytics.

Technologies: React, Redux Thunk, Node.js, MySQL
